Short Answer question.

What are the main aspects in the definition of planning?

Planning provides directions, reduces risks of uncertainty, reduces overlapping and wasteful activities, promotes innovative ideas, facilitates decision making, establishes standard for controlling

According to Knoutz & Odonell - planning is deciding in advance what to do, how to do and who is to do it. Planning bridges the gap between where we are, where we want to go.

State the type of plan and state whether they are single use or standing plan.

There are 2 types of plan.

1) single use plan :- A single use plan is developed for a one time event or project. These plans include programmes and projects

2) standing plans :- This plan is used for activities that occur regularly over a period of time. Standing plan includes policies, procedures, methods and rules

A type of plan which serves as a controlling device as well (budget) single use plan.

MMP Class Test - 1. (B)

1. Elaborate the concept quality. Discuss the Elements of total quality management.

In the 1940's, during World War II, quality became more statistical in nature. Statistical sampling techniques were used to evaluate quality, and quality control charts were used to monitor the production process. Today, successful companies understand that quality provides a competitive advantage. They put the customer first and define quality as meeting or exceeding customer expectations.

Meaning:-

Total quality management ensures that every single employee is working towards the improvement of work culture, processes, services, systems and so on to ensure long term success. Quality Manager

Elements of Total quality management:-

Quality is an essential parameter which helps organisations outshine their competitors and survive the fierce competition.

The success of total quality management depends on following eight elements which are further classified into following four groups.

- Foundation
- Building Blocks.
- Binding Mortar
- Roof.
