Quality Initiatives/ Activities Report

1. **Name of Department:** Chemistry
2. **Name of Organized Activity:** Seminar Activity of the students of B.Sc.-III.
3. **Date:** Throughout the year.
B.Sc.-III: Sem. V and Sem.- VI
4. **Duration:** 2.00 pm. In class room No. 20
B.Sc.-III: 15 min. for each student.
5. **Aims and Objectives:**
 - i. To develop the stage daring and self confidence of the students .
 - ii. To make the students ready to face the interviews for the placements in Industries, Companies and colleges for a job opportunity.
 - iii. It helps to enhance the personality development to have a good impression in interviews.
 - iv. It strengthens the hard working ability of the students to grab the success and it becomes a healthy practice throughout the life.
 - v. It develops the communication skill to have a good impact on examiners or judges.
 - vi. It enhances the presentation skill of the students.
6. **No. of beneficiaries:** B.Sc. III: 75 students.
7. **Expenditure & funding agency:** Department of Chemistry
8. **Brief Description:**

Department of Chemistry has already started this best practice since last 10 years for B.Sc.-III year students and it's proved that there are a lot of benefits of this activity for the students.

The students of UG use to select the topic of their choice for seminar and each student gives the presentation in the classroom. He prepare himself for the

seminar under the guidance of the related faculty member. One synopsis containing the photograph of student, name, and roll number along with the abstract on which he is going to deliver a seminar has to submit to the department. All other students and teachers attend the seminar and based upon that selected topic, students and teachers ask the him questions .The record of this Seminar activity is maintained throughout the year.

9. Outcomes:

The UG students became self-confident, they acquired good presentation skill to explain the concepts properly and get developed themselves in communication skill with each other as well as personality development also matters a lot.

Notice

All the students of B.Sc.-III are hereby informed that their **Seminar Activity** (2023-24) will be conducted from 01/02/2024 (Thursday) at 2.00 pm. after lectures. Each one has to deliver seminar on specific topic from any subject—organic, inorganic physical or Industrial chemistry. Please prepare synopsis and take guidance faculty. Be ready for this activity as per schedule given herewith.

Date 14-1-24

Subject Chemistry - Physical Chemistry

Title of the Seminar Thermodynamics

SYNOPSIS

- 1) Introduction
- 2) Free Energy : Gibb's function (G) and Helmholtz function (A)
- 3) Relation between G and A
- 4) Changes in G and A in isothermal process.
- 5) Significance of G and A
- 6) Criteria for Thermodynamics Equilibrium and spontaneity
all points with derivation and explanation.

Subject Chemistry

Title of the Seminar Photochemistry: Claws of photo
chemistry.

SYNOPSIS

1] Photochemistry; It is the branch of chemistry which deals with the rates and mechanisms of reaction taking place due to exposure of a system to light radiations whose wavelength lies in the ultraviolet and visible region. i.e. wavelength range from 2000 \AA to 8000 \AA .

2] Law of photochemistry

1] Grotthus Draper law.

2] Lambert law

3] Lambert Beer's law

4] Stark-Einstein law

2] Lambert law: Definition and Derivation

3] Lambert Beer's law: Definition and derivation

Subject Chemistry (Organic)

Title of the Seminar Pharmaceuticals: Introduction,
Drug qualities of an ideal drug & Classification.

SYNOPSIS

- Introduction: History of drug. Definition of drug.
- Qualities of an ideal drug.
 - Eight qualities that ideal drug should have.
- Classification of Drugs.
 - (A) Functional Drugs: What are functional drugs.
Further Classification of functional drugs.
 - (i) CNS Stimulants: Information and examples.
 - (ii) Tranquillizers: Information and examples.
 - (iii) Hypnotics: Information and examples.
 - (iv) Sedatives: Information and examples.
 - (v) Anticonvulsants: Information and examples.
 - (vi) Anaesthetics: Information and examples.

Subject Chemistry

Title of the Seminar Spin-Spin Splitting

SYNOPSIS

① The splitting of NMR peaks due to non-equivalent protons is called Spin-spin Splitting.

② Let us take an example of $\text{Cl}_2\text{CH}-\text{CH}_2\text{Cl}$. The splitting of this molecule is shown below.

③ The splitting of H-① is due to the different possible orientations of neighbouring H-atoms. One of the orientations is in fig. below.

④ The similar splitting of H-② is due to the same reasons as in point ③ which is explained below.

Subject Organic chemistry

Title of the Seminar IR spectroscopy [Infrared Spectroscopy]

SYNOPSIS

IR spectroscopy

What is mean by IR?

Spectroscopic technique where there is a interaction of infrared radiation with the molecule

This is known as IR spectroscopy.

- IR spectroscopy is an useful tool to identify functional groups in organic molecules

- This IR spectroscopic technique deals with only IR region

so range of IR region is 12500 cm^{-1} to 500 cm^{-1}

This region divided into three parts
