1. Elaborate the concept quality. Discuss the elements of total quality management.

→ In the 1940's, during World War II, quality became more statistical in nature. Statistical sampling techniques were used to evaluate quality, and quality control charts were used to monitor the production process. Today, successful companies understand that quality provides a competitive advantage. They put the customer first and define quality as meeting or exceeding customer expectations.

Meaning:-

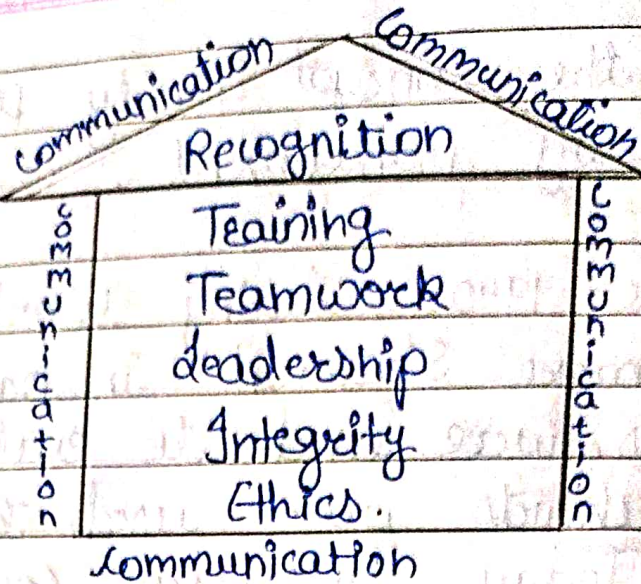

Total quality management ensures that every single employee is working towards the improvement of work culture, processes, services, systems and so on to ensure long term success. Quality Manager

Elements of Total quality management:-

Quality is an essential parameter which helps organisations outshine their competitors and survive the fierce competition.

The success of total quality management depends on following eight elements which are further classified into following four groups.

- Foundation
- Building Blocks.
- Binding Mortar
- Roof.

Conclusion:-

Total Quality Management is practiced by many business organisations around the world. It is proven method for implementing a quality conscious culture across all the vertical and horizontal layers of the company.

Q2: Contribution

2. Contribution of Edward Deming toward quality concept.

Deming has been universally acclaimed as one of the founding fathers of Total Quality Management, if not the founding father. The revolution in Japanese manufacturing management that led to the economic miracle of the 1970s and 1980s has been attributed largely to Deming.

* Total Quality Management can be divided into four categories :-

- 1) Planning
- 2) Do
- 3) Check
- 4) Act.

* Deming's 14 Obligations of Top Management.

- 1) Create consistency of Purpose
- 2) Adopt a New Philosophy.
- 3) Create dependence on Inspection.
- 4) Stop Awarding Business based on \$\$ Alone.
- 5) Continuous Improvement on Production Processes
- 6) Modernize on Job Training.
- 7) Institute Leadership.
- 8) Drive out fear.

Elaborate the concept quality. Discuss the elements of total quality management. Introduction -

In the 1940's, during World War II, quality became more statistical in nature. Statistical sampling techniques were used to evaluate quality, and quality control charts were used to monitor the production process. Today, successful companies understand that quality provides a competitive advantage. They put the customer first and define quality as meeting or exceeding customer expectations.

Meaning -

Total quality management (TQM) ensures that every single employee is working towards the improvement of work culture, processes, services, systems and so on to ensure long term success.

Elements -

Quality is an essential parameter which helps organizations outshine their competitors and survive the fierce competition.

The success of total quality management depends on following eight elements which are further classified into following four groups.

- 1) Foundation
- 2) Building Bricks
- 3) Binding Mortar
- 4) Roof
