**Topic:** REPORT ON INDUSTRIAL VISIT TO MAURYA GROUP

**Organized by:** Department of Management Studies, MBA Program

**Date:** 19<sup>th</sup> December 2025

**Venue:** Maurya Group, 5 Star MIDC Kagal, Kolhapur

**Participants:** MBA- I Students

**Faculty Coordinators:** Mrs. Srushti N Kore & Mr. Vijaykumar J Khot

The Department of Management Studies organized an enriching industrial visit to Maurya Group as part of its commitment to provide holistic management education that combines theoretical knowledge with practical industry exposure. Industrial visits constitute a crucial component of the MBA curriculum as they enable students to transcend the boundaries of classroom learning and witness firsthand how business organizations operate in real-world environments. The visit to Maurya Group was strategically planned to expose students to the diverse business operations, management practices, and organizational dynamics of a well-established industrial entity. Maurya Group, with its diversified business portfolio and strong market presence, provided an ideal learning platform for MBA students to understand various facets of business management including production processes, quality assurance systems, human resource practices, supply chain operations, and strategic decision-making frameworks. The industrial visit was designed not merely as an observational tour but as an immersive learning experience where students could interact with industry professionals, ask pertinent questions, and gain insights that would significantly enhance their understanding of practical business challenges and solutions. This initiative aligned perfectly with the department's vision of producing industry-ready management professionals equipped with both theoretical acumen and practical wisdom. The industrial visit commenced with a comprehensive orientation session conducted by senior management representatives from Maurya Group who welcomed the students and provided an overview of the organization's history, vision, mission, business verticals, market position, and competitive advantages. This introductory session set the context for the subsequent facility tour and helped students understand the strategic positioning of Maurya Group within its industry sector. The presentation highlighted the organization's journey from its inception to its current stature, emphasizing key milestones, strategic decisions, and growth trajectories that shaped its evolution.

Following the orientation, students were divided into smaller groups and taken on guided tours of various operational units within the Maurya Group facility. The tour covered multiple functional areas including production floors where students observed manufacturing processes, quality control laboratories where they learned about testing procedures and quality assurance protocols, warehousing and logistics sections where inventory management and supply chain operations were explained, and administrative offices where they gained insights into support functions like human resources, finance, and marketing departments. At each station, experienced personnel explained the specific processes, challenges encountered, and innovative solutions implemented to enhance efficiency and productivity. The production floor visit proved particularly enlightening as students witnessed the transformation of raw materials into finished products through systematic manufacturing processes. They observed how production planning, resource allocation, workforce management, and quality checks are coordinated to ensure optimal output while maintaining cost efficiency. The quality control section demonstrated the organization's commitment to excellence through rigorous testing procedures, adherence to international standards, and continuous improvement initiatives. Students were impressed by the sophisticated equipment and methodologies employed to maintain product consistency and customer satisfaction. The interaction session with senior executives and departmental heads constituted a highlight of the visit as students engaged in meaningful discussions about business strategies, market dynamics, human resource policies, sustainability initiatives, and future growth plans. Students asked insightful questions about leadership challenges, talent management practices, innovation strategies, customer relationship management, and how the organization balances profitability with social responsibility. The executives shared candid perspectives on their professional journeys, decision-making experiences, lessons learned from failures, and advice for aspiring management professionals. This dialogue created valuable networking opportunities and provided students with mentorship insights that would guide their career development. The industrial visit to Maurya Group proved to be an exceptionally valuable learning experience that significantly enriched the academic journey of MBA students. The visit successfully achieved its objectives by providing practical exposure to business operations, offering insights into contemporary industry practices, and facilitating meaningful interactions with experienced professionals. Students returned with enhanced understanding, renewed motivation, and clearer career perspectives. The Department of Management Studies remains committed to organizing such industry-interface programs that prepare students for successful corporate careers by complementing classroom education with real-world exposure and experiential learning opportunities.
