Brief Discussion	Mr Sanket Desai, Sai Industries, MIDC, Shirol, Kolhapur, Maharashtra, India have given useful information on LMC machines during this industrial study tour. The industrial visit is considered one of the most tactical methods of teaching. It provides students with an opportunity to learn practically through interaction, working methods and employment practices. It gives exposure from an academic point of view. The primary goal of these visits is to help students gain practical knowledge over and above the theoretical concepts that they learn in class and to help them in becoming efficient and effective engineers and managers in the industry. Industrial visits also enable the students to understand and experience actual work environments.																
Outcomes	Students got an opportunity to interact with employees and thereby comprehend issues and situations that are encountered by them.
