Mentor Mentee Report

A program for student mentorship is a crucial initiative. With this exercise, students' issues and challenges can be comprehended, and they can then receive appropriate guidance and counselling. In total, four students from B.Sc. III were mentored during the mentorship program. The students faced a variety of challenges, including issues with transportation, comprehending scientific terminology, organizing their notes, and working on projects and practicals. The students received the appropriate guidance, which also assisted them in finding solutions. This activity helped the student to develop the self-esteem and improve the confidence to face the academic challenges.
