To enhance the overall teaching-learning experience, several strategies can be implemented. Firstly, active learning methodologies should be embraced, including collaborative projects, discussions, and problem-solving activities to engage students actively and foster critical thinking skills. Secondly, integrating technology into the curriculum through online platforms, multimedia resources, and interactive tools can create dynamic learning environments and provide flexibility for accessing materials. Lastly, establishing regular feedback mechanisms for both students and faculty can help identify areas for improvement and drive continuous enhancement of teaching methods and course content. By implementing these suggestions, the institution can create a more engaging and effective learning experience for all stakeholders.

Past year theory question papers are not available on website..there was some irregularness in management of timetable.. practical's shedule is not fixed & lab instruments are not well accurate.. I found somewhat more exam fees we have to pay for each semester

The education is already good

- 1.Complete the syllabus in time
- 2.Treat everyone equally
- 3 . Don't Discriminate
- 4 .Give everyone a chance in program planning, don't always give a chance to your favorite students

Teachers should teach using audio and videos.  
They should complete whole syllabus before exams.

Classroom should not be beside construction building.

It's very good learning institution

Institute should focus on practical study not on theory study
